Summary

Results-driven Software Developer with 3 years of professional experience. Experienced in developing innovative solutions using Python, JavaScript, C++, C#, and modern web frameworks. Strong background in algorithm optimization, API integration, and scalable application development. Holds a Bachelor of Science in Applied Mathematics from Washington State University. Passionate about delivering high-quality software solutions that enhance user experience and performance.

Experience

Data Annotation Tech - Software Developer

October 2023 - January 2025

- Trained AI large language models on software development and code generation.
- Unit tested AI model code output for accuracy and correctness.
- Managed multiple projects utilizing Python, JavaScript, C++, C#, and Ruby.
- Ensured adherence to coding standards, best practices, and readability
- Analyzed and provided detailed feedback on AI-generated code responses to enhance model accuracy and performance across various programming tasks.
- Completed over 5,000+ high quality annotation tasks.

Interco - Software Developer

May 2022 - September 2023

- Developed Unreal Engine and Unity plugins integrating OpenAI GPT-4 and Stable Diffusion using C++ and Python.
- Integrated AWS services (Cognito, S3, EC2, Lambda) and rendered graphical features with OpenGL.
- Built a financial analysis website with React.js, translating Figma designs into responsive UI.
- Implemented cryptocurrency trading automation using RESTful APIs (Coinbase, Alpaca, Binance).
- Developed interactive mobile and AR web applications using Three.js and WebXR for 3D model visualization.
- Engaged with clients to refine and implement functional web solutions through iterative development.
- Started as an intern before transitioning into a full-time Software Developer role, contributing to AI-powered plugins and financial analysis tools.

Lowkel - Software Developer

April 2021 - April 2022

- Engineered route optimization software in Python to enhance delivery efficiency.
- Built JavaScript-based tools with MongoDB for large-scale product data correction.
- Improved site search accuracy by 50% with multi-word query processing, fuzzy search, and Levenshtein-based typo correction.
- Reduced search result processing time from 10 seconds to 1 second.
- Conducted QA testing to refine mobile app UI/UX.
- Started as an intern before transitioning into a full-time Software Developer role.

Wild Waves - Ride Operator

May 2016 - August 2018

- Welcomed and instructed park guests onto the Sky Coaster attraction.
- Worked efficiently in a team of 6.
- Greeted and sold tickets to guests maintaining positive customer relations.
- POS Trained.

Education

Washington State University

August 2016 - May 2020

- Bachelors of Science - Applied Mathematics

Skills

- Programming Languages: Python, C++, C#, Java, JavaScript, Ruby
- Web Development: HTML, CSS, Node, Express, React
- Services & Deployment: AWS Cognito, S3, EC2, Lambda
- Version Control & Collaboration: Git, GitHub, Agile Methodologies, Scrum, Jira
- Data & Databases: MongoDB, SQL, MATLAB, R, Stata
